EY

Beau Plan, Mauritius

Dear Hiring Manager,

I am excited to apply for the IT Auditor position at EY. With a strong background in software engineering, combined with a passion for innovation and efficiency, I am confident in my ability to contribute to your team and support EY's commitment to building a better working world.

My academic background in Computing, obtained from the African Leadership College in partnership with Glasgow Caledonian University, has equipped me with a solid foundation in computer science and information systems. My professional experience has further honed my skills in various technical areas including Python, Java, JavaScript, SQL, and several frontend and backend technologies. In my current role as a Software Engineer and Research Assistant at Hydrus Labs, I have developed and deployed solutions that significantly enhanced data collection and processing efficiency. These experiences have not only sharpened my technical skills but also deepened my understanding of system efficiency and IT controls.

EY's emphasis on a growth-oriented mindset and innovative problem-solving resonates with me. Throughout my career, I have demonstrated a proactive approach to learning and growth. For instance, at Global Green Visa, I designed and developed a user interface that improved visitor experiences and integrated a secure payment gateway to support wildlife conservation efforts. These projects required a combination of technical expertise, attention to detail, and effective communication skills.

I am particularly drawn to EY's inclusive culture and the opportunity to work with diverse teams. My work in various team environments has taught me the value of embracing diverse perspectives to drive innovation and achieve better results. I am eager to bring my collaborative spirit and technical acumen to EY, where I can contribute to the evaluation of clients' IT environments and the testing of IT controls as part of integrated audit teams.

Moreover, I am excited about the continuous learning opportunities at EY, such as the study leave for the Certified Information Systems Auditor (CISA) exam and the fully funded CISA courses. These opportunities align perfectly with my career goals and my commitment to staying relevant in the ever-evolving IT landscape.

I am confident that my technical skills, coupled with my proactive and inclusive approach, make me a strong candidate for the IT Auditor position at EY. I am excited about the prospect of contributing to your team and helping EY's clients maximize their performance and return on investment through effective IT auditing.

Thank you for considering my application. I look forward to the opportunity to discuss how my background, skills, and enthusiasm align with the goals of EY.

Sincerely,

Justus Wamswa Chemirmir.
